

➤ **Broadband & Data Connectivity**

Connected World delivers a complete range of business connectivity solutions that can be tailored to support your individual needs.

We use only the best next generation networks so that we can offer you the most wide-ranging portfolio of secure network solutions, allowing you to share files, applications and data between sites and co-workers quickly and safely.

Broadband & DSL

Business broadband for small businesses is available from just £10 a month. For such a competitive price, we can offer speeds of up to 24Mbps, unlimited downloads and prioritised traffic. For larger businesses, we have ADSL business broadband, which is perfect for businesses that want fast broadband connections to home workers and smaller offices.

Ethernet

Ethernet is suitable for businesses that need dedicated, high capacity business broadband. It offers bandwidth of up to 1Gbps, which is perfect for businesses that want to use real-time applications such as video conferencing or IP voice services. Ethernet allows for unlimited, high speed data transfer over a high capability connection that is completely scalable to any size organisation.

MPLS

A private MPLS network allows a business to connect sites and remote workers securely, allowing voice and data traffic exchanges between sites without using the Internet. Our MPLS connectivity solution is an essential traffic management tool, prioritising the most demanding of IT applications.

Leased lines/private network

The perfect choice when your business needs a permanent, high-speed connection between two or more locations with no contention ratio.

➤ **Features**

- Business only connectivity

Products & Services

Inbound NGN's & Services

We can provide a range of virtual, non-geographic telephone numbers not just from the UK, but from countries all around the world. We also provide a wide range of network-based call features which provide phone-system like functionality allowing you to manage incoming calls most effectively.

Calls & Lines

If you have existing lines with BT why not transfer them to Connected World and save at least 10% on your monthly line rental, as well as making great savings on the cost of your calls. Transferring your calls & lines is easy, there's no disruption to your service and it is completely free. We can also transfer lines away from all other leading telecoms providers.

Broadband & Data Connectivity

From simple broadband internet access or dedicated high capacity Ethernet, to leased lines and private MPLS networks, we can connect your businesses to you applications and the internet, with a suite of tailored options to suit every need.

Business Mobiles

We partner with all 5 UK mobile operators, and can facilitate new connections, upgrades, ports and migrations to each network. We provide an independent review and advice to suit your business requirements, covering the best value tariffs and incentive offers, network performance, handsets and devices, and mobile email and broadband.

Phone Systems

Hardware or IP hosted phone systems, which would suit you best? We provide independent consultation and advice and offer a range of solutions to meet every need.
