

 **Fax to Email****Receive faxes easily, securely & discreetly by email.**

This service allows any non-geographic number provided by Connected World to be converted in to dedicated fax line in seconds, allowing you to receive faxes by email whenever you choose. This is a dynamic paperless solution available with no installation and does not require a telephone line, allowing for fast connection of service within minutes.

Faxes are received securely and discreetly as attachments, and can be delivered to multiple email accounts. Faxes can be stored, forwarded or managed just like any other documents, allowing for efficient fax management, with no chance of paper being lost or misplaced.

As no fax machine is required, only print the documents you need, reducing the usage and costs of toner, paper, fax consumables and even electricity. Multiple faxes can be received at the same time, and fax senders will never hear engaged tones.

You have the choice of either choosing a new fax number from the number ranges we have available, transferring an existing non-geographic number you have currently with another service provider, or even porting your current BT landline number, which we would convert to a virtual fax to email service.

Fax to email is a fast, efficient and reliable service, and very cost effective.

To discover more about this service please see the online video presentation.

 **Features**

- Paperless faxing - receive faxes without a fax machine
- Savings on line rental, as no need for a dedicated fax line
- Dynamic - receive faxes wherever you are by email

Products & Services

Inbound NGN's & Services

We can provide a range of virtual, non-geographic telephone numbers not just from the UK, but from countries all around the world. We also provide a wide range of network-based call features which provide phone-system like functionality allowing you to manage incoming calls most effectively.

Calls & Lines

If you have existing lines with BT why not transfer them to Connected World and save at least 10% on your monthly line rental, as well as making great savings on the cost of your calls. Transferring your calls & lines is easy, there's no disruption to your service and it is completely free. We can also transfer lines away from all other leading telecoms providers.

Broadband & Data Connectivity

From simple broadband internet access or dedicated high capacity Ethernet, to leased lines and private MPLS networks, we can connect your businesses to you applications and the internet, with a suite of tailored options to suit every need.

Business Mobiles

We partner with all 5 UK mobile operators, and can facilitate new connections, upgrades, ports and migrations to each network. We provide an independent review and advice to suit your business requirements, covering the best value tariffs and incentive offers, network performance, handsets and devices, and mobile email and broadband.

Phone Systems

Hardware or IP hosted phone systems, which would suit you best? We provide independent consultation and advice and offer a range of solutions to meet every need.
